

About the Project

What Is E-Bezpečí?

E-Bezpečí is a prevention, education, research and intervention project whose scope of activity includes all the Czech Republic. The project focuses on the issue of hazardous communication phenomena that can be encountered by internet users and users of mobile phones.

Key topics of the project

Among crucial topics the project is dealing with there are:

- **cyberbullying** (various forms of bullying within on-line communication e.g. blackmail, threat, humiliation or ridiculing of victims),
- **cybergrooming** (communication with unknown internet users with the aim of tricking the victim into meeting the aggressor in person),
- **cyberstalking and stalking** (various forms of dangerous stalking),
- **spam and hoax** (unwanted, fraudulent, startling or differently dangerous messages),
- **sexting** (sharing of sexual content),
- **personal data protection on the internet**,
- **hazards of social networks** (e.g. Facebook).

Our Activity

Project Activities

E-Bezpečí Project does many activities focusing on prevention, education and research in the area of hazardous behavior related to using of ICT.

- A. Lectures and workshops for different target groups** (for children, parents, teachers, police officers, social workers and others).
- B. Consultancy in the area of social-pathologic phenomena related to use of internet and mobile phones.** (On-line consultancy centre).
- C. Making educational materials for different target groups.**
- D. Internet portal E-Safety operation.**
- E. Regular radio broadcasts.**
- F. Scientific-research activity** (on-line survey researches, scientific and educational grant projects, conferences).

E-Safety Project is run and guaranteed by Centre for the Prevention of Risky Virtual Communication, Faculty of Education, Palacký University, Olomouc (PRVoK Centre). See www.prvok.upol.cz.

Partners and Participating Institutions

Educational Activities

Target Groups

E-Bezpečí tries to increase awareness of hazardous communication issues which are related to virtual communication which is why it offers a variety of educational events modified for different target groups:

Discussions for primary and secondary school students.
Lectures for university students.
Lectures for teachers.
Systematic education of teachers (certified).
Lectures for PIS CR Police.
Lectures for OSPOD workers.
Discussions for parents.
Discussions for public.

The Form of Educational Events

Educational events cover particular dangerous phenomena as well as possibilities of prevention and protection from aggressors. The process of getting to know the issues is based on introducing model situations and real cases by presentations and video-records.

Educational Events Duration:

- lectures (4 x 60 minutes),
- discussions (2 x 45 minutes).

For more information, see <http://vzdelavani.e-bezpeci.cz>.

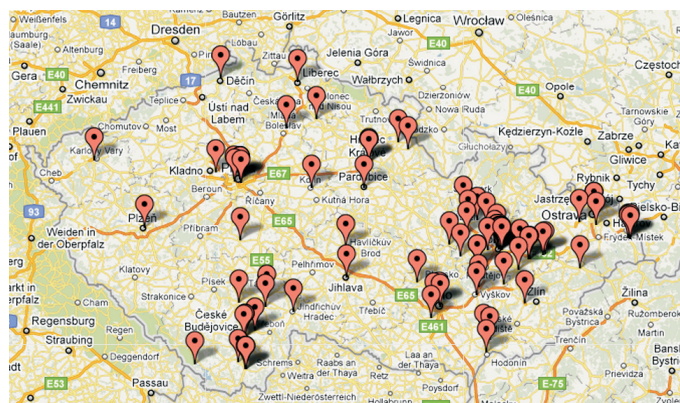

Other Information

Some of our Achievements

During its existence E-Safety Project has organized a great number of educational events. Following chart shows number of people who have gone through our training since the year 2008.

More than 10,000 primary and secondary school students.
More than 600 primary and secondary school teachers.
More than 450 PIS police officers from all regions of the Czech Republic.
More than 500 criminality prevention managers.
More than 200 teacher training students.

Teams of lecturers are active throughout the Czech Republic.

Grant Activity

In cooperation with various institutions (schools, cities, regions, CR Police, MVČR, MŠMT, GAČR, FRVŠ), the centre has gained **more than 20 grants focused on prevention, education, research and intervention** in the area of hazardous behavior in virtual environments since it was founded.

A project **E-Unsafety for Teachers** (www.e-nebezpeci.cz) is an example of a successful regional education project with PRVoK Centre FoE PU participating in it.
